

Amendments to the Specification:

Please amend the paragraph at page 11, lines 7-17 as follows:

The row "previous charge" is to display the accumulative communication charge from the reset before the last to the previous reset in increments ~~units~~ of 1 yen (and the accumulative communication charge is stored into the previous charge 22F of the RAM 22). This row as well as the "specified warning money amount" also displays an accumulative data amount 35 corresponding to the money amount. In this example, the money amount is 999,999 yen and the data amount is 12,499,998.0 KB. A period 36 until the reset was pressed previously is also displayed.
